

TCBEXT0.2

Filtered IV Extension Set 0.2µm

- +
- Engineered to provide advanced filtration, eliminating endotoxins, bacteria, and air bubbles from infusions.
- +
- Compact extension set is ideal for applications requiring precise filtration, offering exceptional reliability and protection in various clinical environments.
- +
- Minimizes the risk of infection and contamination, making it ideal for medications requiring filtration.
- +
- Reduces tangling and line adjustments, ensuring a smooth infusion experience in small or limited spaces.
