

## TCBEXT1.2

### Filtered IV Extension Set 1.2µm

- ✚ Designed to enhance safety and efficacy in IV therapy by removing particles, bacteria, and other contaminants before they reach the patient.
- ✚ Ideal for infusing lipids, nutrients, and medications.
- ✚ 12" length is optimized for clinical convenience, allowing for easier management and reduced tubing bulk, making it ideal for tight spaces or precise line extensions.
- ✚ Enables seamless integration into existing IV setups without additional adapters, saving time and ensuring a dependable connection.
