

TCBEXTNFBS-7

7" Standard Bore Bonded Needle Free Extension Set

- +
- Used for enhanced safety, efficiency, and reliability.
- +
- Lower chance of accidental disconnect.
- +
- Eliminates a connection point, reducing the potential for bacterial entry and contamination.
- +
- Eliminates the need for manual assembly, saving time in critical care settings.
- +
- Standard bore tubing for higher flow rates makes this beneficial in fluid resuscitation, blood transfusions, and high volume medication delivery, where rapid administration is critical.
- +
- Minimizes resistance, ensuring consistent and reliable flow, particularly when used with gravity fed IV systems.
