

TCBPTTPS1

PharmAssist[®] Compatible Solution Transfer Tubing

- + Connects effortlessly to a wide range of IV fluid containers, ensuring consistent flow and reducing setup time in busy pharmacy environments.
- + Maintains steady, accurate flow rates, ensuring reliable performance in high-volume compounding.
- + Speeds up sterile compounding, allowing rapid, precise filling of multiple IV bags, elastomeric devices and syringes with minimal manual handling.
- + Reliable and effect alternative to both PA01 and BX01 tubing.
- + Eliminates exposure to harmful plasticizers and allergens, supporting USP 797 and 800 compliance for sterile preparations.
